

Press Release

Expanded International Clinical Trial Services for CNS trials.

Rochester, NY and Princeton, NJ: Date March 30, 2010

Two well established CRO's, Research Dynamics and Diverse Lynx, have formalized their working relationship as a global strategic alliance for CNS clinical trials. The alliance will benefit both companies' clients as it will provide expanded service offerings not only in USA but globally. The alliance will benefit pharmaceutical, biotech and medical device sponsors with the core competencies of both company's CNS therapeutic expertise including shared focus on providing experienced staff and flexible customer service throughout the world.

The CNS therapeutic experience of both Research Dynamics and Diverse Lynx will bring expanded service offerings for their sponsors in the areas of Alzheimer's, Dementia, Cognition, Parkinson's, Schizophrenia, Multiple Sclerosis, Huntington's and others. The two company's also have access to a 3 phase 1 units that is experienced in QT testing on all products.

"This alliance will extend the reach of Research Dynamics beyond North American and Europe and into emerging clinical trial countries for the CNS therapeutic area", noted Lorraine D. Ellis, CEO/President. "The addition of an office in India and investigator sites in Japan and Eastern & Western Europe through Diverse Lynx will expand our capabilities in those countries in many ways."

Speaking on the advantage of the alliance for Diverse Lynx, Shubhendra Varma, President of Diverse Lynx and Dr. Ashok Srivastava, CMO, EVP Clinical and Medical Affairs stated, "Our partnership with Research Dynamics is a big step towards offering the highest quality of clinical monitoring and clinical services. We now have a strong and robust full service CRO infrastructure in over 35 countries in Americas, Europe, Japan and other Asian countries including India. We take this partnership several steps further by emphasizing long-term, value-added relationships and a commitment to understand our sponsors' business needs."
